

Hello All

Please note that the client wants to prepone his trip by a day. The new date is Feb 17 2025.

Also the agenda is now firmed up.

Will setup a time to discuss the participants and preparation plan

Thanks

Peter

Subject: Feb 18 2025 - Wayne Leadership Visit to Hyderabad ODC

Importance: High

Hello Rahul, Sameer,

Please note the tentative agenda for the client visit planned for Feb 18th second half in Hyderabad. Will setup a recurring twice a week on this.

Bruce (MD, Customer Data Technology) reports to Thomas and is responsible for all of Customer data for the enterprise and is responsible for providing customer, party, offer, preferences, etc details to all the applications, channels across business lines. He embarked on a modernization journey in 2018 timeframe and has had mixed success so far. Wants to accelerate with us.

Client wants to focus on the below in this visit

1. Share the Wayne vision and roadmap with our teams and leadership.
2. Spend time with the teams understanding what's working what's not and how can he help us serve Wayne efficiently. Bruce is a big believer in taking partners along towards the vision
3. Areas of immediate priority and ones he wants to hear our stories/case studies, approach, solutions, capabilities are
 - a. **Offer Order Modernization** (Mphasis failed first time – this will all be on us soon)
Bruce has been part of the discussions on our Cobol to Java migrations, He has seen SASVA QE as well and strives to bring efficiencies across the lifecycle using AI/GenAI and get the teams be used efficiently.
 - b. **Data Model and Data strategy** – Specifically interested in how Data can be offered to different parts of the enterprise very much in “Real time” combining with the “Historical information” in DWH along for relevant insights to serve the needs better. Discussed with Swaroop on the Peltio case studies and approaches for such use cases.

We would like to have as much attention provided to this visit and this will go a long way as we make an impression. We can refine this tentative agenda as appropriate.

We need to finalize on

1. Attendees, participants (Leadership, Experts/practitioners both BFSI and Data)
2. Logistics around the events

3. Inauguration of the ODC expansion facility can become part of this visit as well.

 Persistent		Wayne Visit 18th Feb 2025, 2:00 pm IST Persistent Systems Limited (Hyderabad)
